General Description

The KRN8605ARTZ is wideband, low-noise, low-distortion dual operationalamplifier, that offer rail-torail inputs 1 outputs and single supply operationdown to 2.2V.They draw 1.6mAof quiescent supply current while featuring ultra-lowdistortion(0.0002% THD+N), as well as low input voltage-noise density (15nV/Hz) and low input currentnoise density(0.5fAVHz).These features make the devices an ideal choicef or applications that require low distortion and/or low noise.These amplifiers have inputs and outputs which swing rail-to-rail and their input common mode voltage range includes ground. Themaximum input offset of these amplifiers is less than 5mV.

The KRN8605ARTZ are unity gain stable witha gain-bandwidof 10MHz.TheKRN8605ARTZ is available in SOT23-5packages. The extended temperaturerange of -40C to+125C over all supply voltages offers additional designflexibility.
