SOL.FI

SOLANA

Create a decentralized financial ecosystem in which any user can securely invest, trade, and manage funds without being bound by the restrictions of traditional financial institutions

01 Introduction

Powered by  SOLANA

Reinventing Solana Engine

01 Pioneering projects

SOL.FI is led by a group of veteran developers dedicated to reshaping the Solana blockchain's application landscape through innovative DeFi solutions with the potential to enable DeFi's financial transformation.

02 Technologists

The project consists of developers with deep blockchain backgrounds who have extensive hands-on experience in programming and application development on the Solana platform.

03 Deep Insight

With an in-depth understanding of DeFi's core value and potential, the SOL.FI team is committed to expanding Solana's market application scenarios by providing fairer and more transparent financial services through innovative financial tools.

04 Infrastructure

Solana is known for its high throughput and low transaction costs, supporting hundreds of thousands of transactions per second. The high-performance infrastructure provides an ideal platform.

05 Innovation

The Solana ecosystem still has tremendous room for growth. By introducing more innovative DeFi projects and partners, Solana has the potential.

06 06 Demand-driven

With the growing global demand for decentralized solutions, Solana faces ongoing technical and market pressures to continually optimize network stability and user experience.

SOL.FI key features

Advanced Security LP Locker

SOL.FI utilizes cutting-edge encryption and authentication technology to provide robust security for liquidity providers' LP tokens, ensuring that assets are safe from compromise.

Competitive APY

We offer attractive APYs that incentivize developers to hold LP tokens for the long term by extending the reward lock-in period, enhancing the stability and liquidity of the ecosystem.

Innovative Functional Integration

SOL.FI goes beyond basic functionality to incorporate innovative designs to enhance user experience and security, including free lock-up period extensions and optimized transaction processing to safeguard user privacy and asset security.

[*Future Utility Solutions*]

SolFi Launchpad is dedicated to providing the resources and support necessary to advance aspiring Solana projects. We empower developers and entrepreneurs to contribute value to the Solana ecosystem through strategic partnerships and a comprehensive incubation process.

Expanding Token Application SolFi tokens are being used in various industries, including decentralized finance, gaming, and digital identity verification. Through innovative application development, SolFi tokens can be used in a wide range of applications and enhance market applicability.

Token Vesting Incentive Mechanism Reward token holders who are long-term holders and active participants in the community through high APY. Strategy aims to reinforce investor loyalty and maintain incentive consistency while building a strong community around SOL.FI.

Community-Driven Governance Transparency and democratization of ecosystem decision-making is achieved through the participation of the Sol.Fi DAO Governance Council and the governance of SolFi token holders, enabling users to directly influence the direction of the project and policy making.

SOULFI

02 Ecology

Powered by  SOLANA

DeFi App Integration

Diversified Financial Services Platform

One-stop solution: The SOL.FI project is dedicated to creating a SOLANA-based aggregated attribute investment platform that will integrate DeFi, GameFi and NFT. It provides users with diversified investment channels, simplifies the process of participating in decentralized finance, and at the same time helps users manage and trade different types of assets efficiently.

Innovators and Pioneers

LEADING TECHNOLOGY APPLICATION: The SOL.FI Project is at the forefront of the industry in the application of new blockchain technologies and ecosystem building. By constantly exploring and implementing the latest blockchain technologies, SOL.FI Project maintains its leading position in the digital currency market. By introducing innovative applications and services, it promotes the development of the entire digital currency market.

- ✓ Technical Upgrades

Token Vesting Incentive

High APY Rewards

SOL.FI offers a high Annual Percentage Yield (APY) for long-term holders, with different levels of APYs based on holding time and volume to incentivize users to increase their holdings and holding time. Long-term holders who hold for more than 12 months will enjoy the highest APY, significantly encouraging holding.

Community Involvement Rewards

Users who actively participate in community events and governance votes will be rewarded with additional tokens. This includes contributions on forums and social media, as well as participation in voting on project decisions, designed to increase community activity and user engagement.

Mobility Provides incentives

Users participate in liquidity mining by providing liquidity and receive transaction fees and additional token rewards. Users who participate in the liquidity pool for a long period of time enjoy additional APY rewards based on the amount and duration of liquidity provided, ensuring project liquidity and market stability.

Expanding Scenarios

Non-intermediated

Provide decentralized financial services, including lending, trading, and insurance, without the need for traditional financial institutions to act as intermediaries.

Smart Contract Driven

The service is automatically executed based on smart contracts, which improves transaction efficiency, reduces costs and increases transparency.

Openness & Accessibility

DeFi provides financial services to a wider range of users, especially those marginalized in the traditional financial system.

DeFi Services Integration

SOL.FI will integrate a series of DeFi services including, but not limited to, decentralized lending and trading platforms that will enable users to perform various financial operations directly on the SOL.FI platform.

Increased Investment Options

Users can easily access and participate in a variety of decentralized financial products, such as lending pools and liquidity mining, thereby increasing the flexibility and diversity of investments.

Increasing Revenue Potential

Through DeFi, SOL.FI offers users additional revenue opportunities, especially for those seeking high yields and participation in emerging financial products.

DeFi Integration

Diversified Asset Integration

Comprehensive coverage of the market's major cryptocurrencies

Explore high-potential emerging tokens

Multiple stablecoins to reduce volatility risk

Innovative tokenization of physical and financial assets

Support for derivatives trading

Diversified cryptocurrency futures provides market forecasting tools

Flexible cryptocurrency options to support diversified risk management

Innovative swaps to optimize asset allocation efficiency

Effective tool to hedge against market volatility

DeFi Product Convergence

Provide rich liquidity mining options to incentivize user participation

Flexible lending services to broaden capital utilization

DEX Integration, Enjoy the Freedom of Decentralized Trading

Unlocking Emerging DeFi Investment Paths to Explore High Yield Potential

NFT Flow Interaction

Collect
Sell
NFTs.

NFTs are one-of-a-kind assets on the blockchain that represent unique objects in the digital world, digital art, collectibles, and even virtual real estate. NFTs provide clear proof of ownership of digital assets and ensure their authenticity and scarcity. The NFT Marketplace will support the trading of all types of digital assets, providing artists and creators with a new channel to showcase and monetize their work.

NFT Platform

SOL.FI will gradually build the NFT trading and investment platform, allowing users to buy, sell and invest in different types of NFTs. NFT and chain travel are interoperable.

Value-added

The limited edition NFT issued by Eco-will drive users to explore the value-added potential of the NFT market, investing in digital art and other unique assets that grow in value over time.

Integration

It will ensure a smooth and user-friendly NFT transaction process, so that users can easily participate in the purchase, sale and holding of NFT, enjoy the fun of digital collection and return on investment.

GameFi Enabled

Game

GameFi combines the entertainment and financial monetization of games, where players earn rewards of real value by participating in game activities, such as completing quests or challenges.

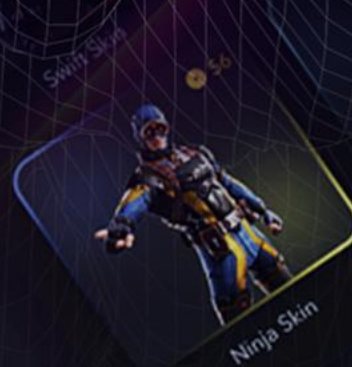

Token

Rewards exist in the form of \$solfi and NFT, making players' in-game achievements and collectibles transferable and tradable.

Economy

GameFi promotes player engagement and loyalty through financial incentives, while creating a new market for digital assets.

The SOL.FI project will gradually integrate GameFi elements into its ecosystem, offering users the opportunity to participate in game finance. Users can earn financial rewards by participating in GameFi activities, such as earning in-game tokens or trading rare in-game items.

03 Token Economic

Powered by  SOLANA

Secure LP Cabinet

Secure LP locking mechanism

At Solfi, safety is a top priority. Use cutting-edge encryption technology and multi-level authentication to ensure that LP tokens are securely locked through \$solfi tokens, prevent hacking and malicious operations, and protect user assets.

Attractive Annual Return (APY)

High APY rewards for locked LP tokens, issued in \$solfi tokens. Increase the application value of \$solfi tokens by encouraging long-term lock-in, improving return on investment, and promoting stability and liquidity in the Solana ecosystem.

Developer trust

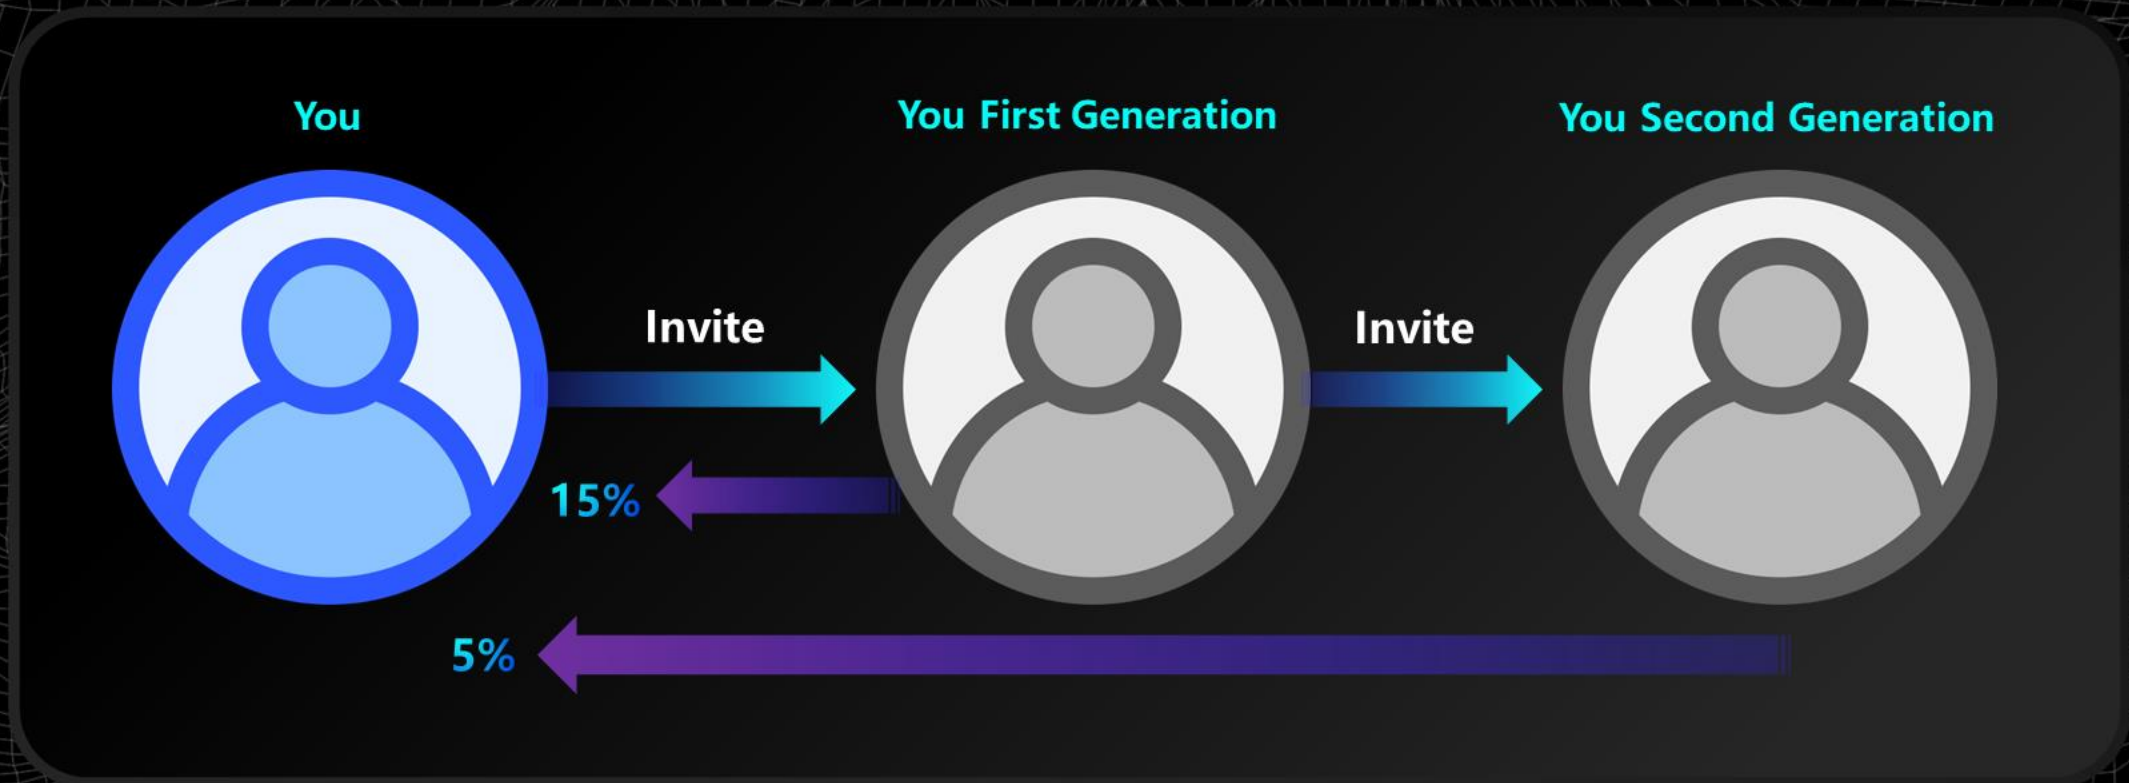

Developers can rely on the Solfi platform to protect their assets with \$solfi tokens. Cutting-edge security measures and the dual assurance of \$solfi tokens ensure the integrity and security of LP tokens, reduce risk and enhance platform reliability.

Promotional Income *Direct Invitation*

First generation revenue: 15% of revenue from direct referrals

Second generation revenue: 5% of subordinate revenue from direct referral users

Promotional Income Others

Team Revenue

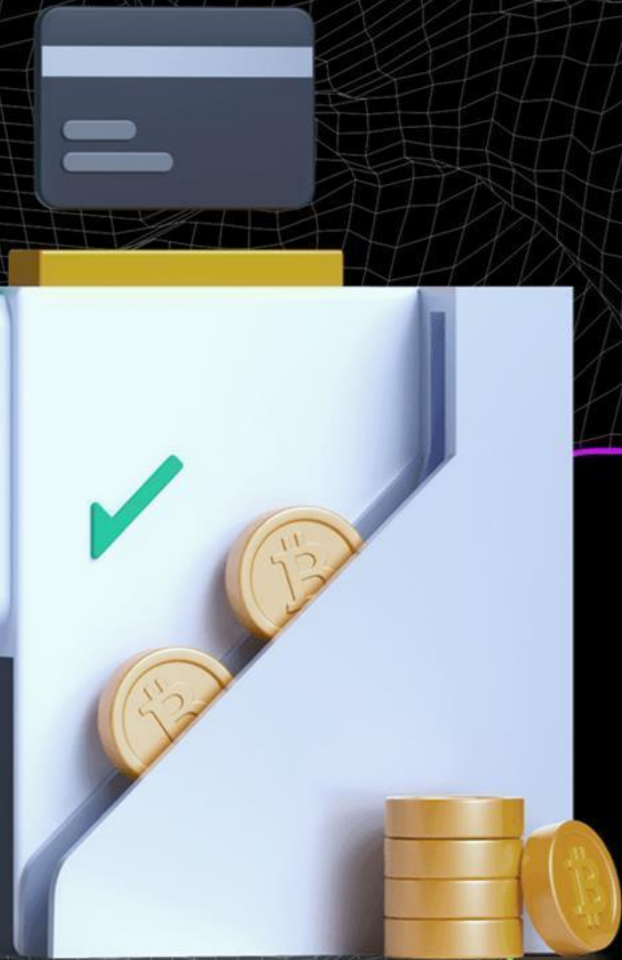

Level	Invite people	Group Sales	Team Requirement	Percentage of daily earnings
V1	5 people	500 SOL	-	20%
V2	-	-	2 departments reached V1 level	30%
V3	-	-	2 departments reached V2 level	40%
V4	-	-	2 departments reached V3 level	50%
V5	-	-	2 departments reached V4 level	60%

Dividend Income

- V5 level: If you are a V5 yourself and directly recommend two V5S, you will share 2% of the daily revenue output of the entire platform.

Static Income

- 0 day lock-up period: 0.6% per day, 1 SOL per pledge, 1 \$solfi per day
- 30-day lock-up period: 0.9% per day, 1 SOL per pledge, 1 \$solfi per day
- 90-day lock-up period: 1.3% per day, 1 SOL per pledge, 1 \$solfi per day

The use of \$solfi

Participate in governance

Holders of \$solfi tokens can participate in the governance of the SOL.FI ecosystem by voting on key project directions and decisions. Ensure the decentralized autonomy of the community and enhance the user's sense of participation and control over the project.

Liquidity provision

Users can earn \$solfi tokens by providing liquidity, supporting the liquidity pool of trading pairs, improving market liquidity and trading efficiency. Liquidity providers will enjoy transaction fees and additional incentives to enhance the application value of the token.

Mortgage and loan

\$solfi tokens can be used in mortgage lending platforms to lend other cryptocurrencies or fiat currencies as collateral assets. Users can use tokens to release liquidity and meet short-term funding needs, while continuing to participate in the revenue distribution of the project ecology.

Reward and incentive

The \$solfi token acts as a reward mechanism within the ecosystem to motivate users to participate in community building, development contributions, and marketing. Through the irregular incentive program, increase user activity and loyalty, and promote the healthy development of SOL.FI ecology.

Community-driven

The right of holders to vote

\$solfi holders directly participate in major decisions through voting, influencing rule updates and new feature implementations

Proposal system participation

Community members use \$solfi to submit proposals that actively shape the development and policies of the ecosystem

Community incentive program

Create incentives for \$solfi holders to participate in community building and governance

Governance transparency

An open decision-making process visible to all \$solfi holders, ensuring fair and transparent governance

Decision influence

\$solfi holders have a vote on the ecosystem's strategic development, ensuring community centrality

Black Dragon Initiative *Not announced*

✓ **Drives innovation and change in ecosystem**

✓ **Support projects through strategic investments**

✓ **Use a network of cooperative resources**

✓ **Committed to promoting Solana ecosystem**

✓ **Promote the wide application of blockchain**

04 Project Roadmap

Powered by  SOLANA

SOLFI Project Roadmap

2023.4 - 2023.8

- ① - Complete Solfi testing to ensure system stability and performance optimization
- ② - Conduct TVC Bot testing to verify the accuracy and efficiency of automated trading algorithms
- ③ - Launch the META trading module to enhance platform diversity and trading depth
- ④ - Execute smart contract testing to ensure the security and reliability of contracts

2023.8 - 2023.12

- ① - Deep technical integration and testing of Solfi by the experienced ETHFI development team
- ② - Secure a \$15 million strategic investment from Binance Lab to support platform growth

2024.1 - 2024.4

- ① - Organize Solfi marketing and technical team seminars to formulate future development strategies
- ② - Successfully complete restaking tests to enhance platform liquidity and user returns

2024.9 - 2024.10

- ① - Release Solfi Wallet and Solfi PAY, offering convenient crypto asset management and payment solutions

2024.8

- ① - Officially launch the Solfi platform in over 11 countries, providing global services

2024.5 - 2024.7

- ① - Launch global marketing roadshows, starting in the United States to promote the Solfi brand
- ② - Conduct live demonstrations on the Binance platform to expand the user base and market influence

SOLFI Project Roadmap

2024.10 - 2024.11

- ① - List Solfi tokens on multiple major exchanges to increase token liquidity and market recognition

2024.11 - 2024.12

- ① - List Solfi tokens on Binance, OKEx, MoRiGlobal, and over 20 other exchanges
- ② - Release Solfi Version 2 to enhance user experience and functionality. Incentive policy updated to release Solfi.

2025.1 - 2025.3

- ① - Launch the Solfi protocol and open the inscription system
- ② - Initiate internal testing of the Sol Dog GameFi project, exploring new areas of blockchain gaming

2025.9 - 2025.12

- ① - Solfi & Tronfi operation and technical teams complete the development of Tronfi

2025.4 - 2025.8

- ① - Officially release the Sol Dog network and Sol smart contracts for public use

05 Cooperation

Powered by  SOLANA

Consultant Team

The SOL.FI Project Consultant team is a team of highly professional and experienced talents. These members have a deep background and rich practical experience in the field of software security technology.

The advisory team has expert-level knowledge in the fields of financial transactions, information security, artificial intelligence and blockchain to provide strategic guidance and technical support for the project.

Ecological Cooperation
