# Core business areas

## Construction Engineering Sector

We have participated in the design and construction of a number of benchmark projects in Shenzhen, Shanghai and other cities in China. At the same time, we have also undertaken the construction of a number of high-quality projects in overseas markets such as North America, the Middle East and Southeast Asia, which have won wide recognition from customers.

Our business covers decoration, landscape, theme packaging, etc., providing domestic and foreign customers with full-chain solutions from scheme design, material supply to project landing

G-MOO

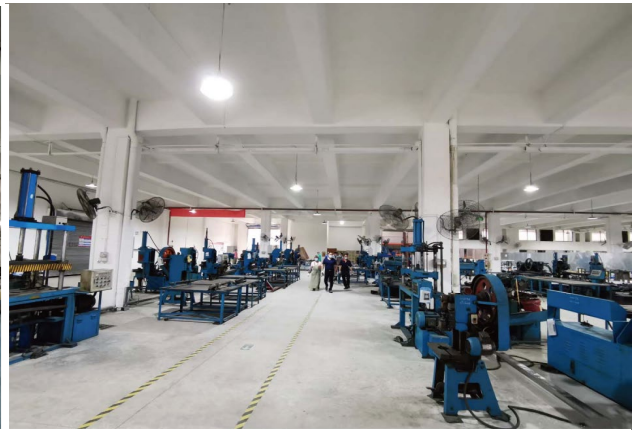

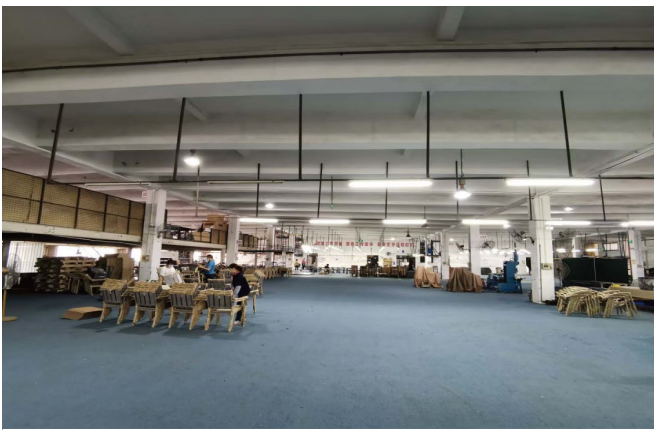

# Core business areas

## Building Materials Sector

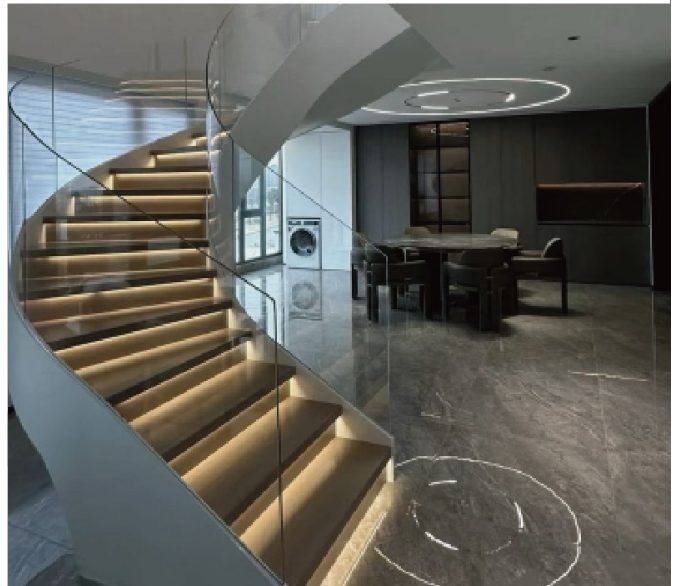

We focus on the R&D, production and sales of indoor and outdoor building materials and household goods. The company focuses on the R&D of new building materials and the design of high-end household goods, providing the best quality and environmentally friendly products and perfect service experience for domestic and foreign customers. At the same time, it also provides one-stop services such as trade brokerage, domestic and international trade agents.

The main products include cabinets, wardrobes, bathroom cabinets, aluminum alloy doors and windows.

G-MOO

# Competitive Advantage

**Integration of industry and trade**

Every step from raw material procurement to production processing is strictly controlled; simultaneously, the company possesses extensive experience in engineering construction and project management, ensuring higher reliability in product quality and after-sales service.

**Technological leadership**

Focus on the research and development of new material technologies and promote the intelligent and customized development of various products.

**Resource integration**

Integrate building materials and furniture manufacturing, supply chain management, and cross-border trade resources to achieve efficient delivery.

**Compliance operation**

Strictly abide by international quality standards and trade regulations, and hold complete qualification certification.

**Outstanding design**

We have our own design department. In addition to the common designs on the market, more creativity and ideas of customers can be solved after communicating with the design department. From design to processing, our own team communicates more efficiently and the finished products are more in line with customer needs.

The quality is reliable and the price is reasonable. G-MOO is engaged in the integrated business, covering from design and production to processing, logistics, construction and after-sales service.

In the future, G-MOO will continue to use innovation as the engine and quality as the cornerstone to help the global construction industry move towards a new era of intelligence and greening.
